Wind blows floss apart. A hall, patio or marquee is best on breezy days.

Have a standard plug point ready close to where you want the machine.

Tell us your sugar colours when you book so everything is ready on delivery.

Clear queue space

Leave space in front of the machine for children to wait safely with an adult nearby.

Safety information

Candy floss machines have a fast spinning head that gets hot. Correct use and adult supervision are essential for safe, fluffy floss at your party.

Essential safety rules

- Only adults should operate the spinning head while it is running.
- Keep fingers, hair, jewellery and loose clothing away from the spinning bowl.
- Use on a stable surface away from strong wind where possible.
- Supervise children when collecting floss on sticks.
- Switch off and allow to cool before cleaning or pack-down.

Spinning head hazards

The spinning head rotates at high speed. Never reach into the bowl while the machine is on. Tie back long hair and roll up loose sleeves before spinning.

- Wait for the head to stop completely before adding sugar or cleaning.
- Keep the machine on a table at a comfortable working height to avoid leaning over the bowl.
- Do not allow children to operate the machine unsupervised.

Wind, sugar and slips

- Wind blows floss and loose sugar around. Use shelter outdoors.
- Wipe sugary spills on floors promptly to prevent slipping.
- Keep sugar bags sealed and off damp ground.

Electrical safety

- Keep power cables away from the spinning area and guest walkways.
- Do not use in rain or when the machine or plug could get wet.
- Switch off at the wall if you relocate the machine.

Weather policy and instructions

Candy floss is light and sensitive to wind and humidity. Planning shelter and timing helps you spin perfect floss instead of sugar drifting across the lawn.

Ideal conditions

Indoor venues and fully covered marquees give the best results. Outdoors is possible only with good shelter on three sides and a stable, level table.

- Calm or very light wind
- Dry air and a dry spinning area
- Adult-only operation while the head is running
- Clear space so guests are not walking through floating floss

Wind - the main outdoor risk

Even moderate wind pulls floss off the cone, blows sugar out of the bowl, and creates a sticky mess downwind. We may ask you to pause outdoor use if gusts pick up.

- Do not set up in open gardens without a gazebo or marquee
- Close marquee sides on windy sides where safe
- Stop spinning if hair, clothing or nearby displays are catching sugar

Rain, humidity and heat

Rain must not reach the machine or power supply. High humidity can make floss slightly heavier and stickier; very hot direct sun can affect sugar flow.

- Move under cover before rain starts - do not operate wet equipment
- In humid weather, spin slightly smaller serves and keep the bowl lid on when not in use
- Store spare sugar bags sealed and off damp grass

Rescheduling and backup plans

If your outdoor venue cannot provide adequate shelter, contact us at least 24 hours ahead when possible. We will help with an indoor alternative, a different layout, or rescheduling subject to availability.

Contact us as early as possible when weather may affect your hire. Your booking confirmation includes phone and message details for the day. We prioritise safe use of equipment and fair solutions for Johannesburg, Sandton and Randburg events.
